### **Glendale Adventist Hospital Adopts New Policy and Procedure Management Software**

TEMPE, AZ— Glendale Adventist, one of the most well-known hospital systems, has installed Indidge Systems idTrack-Docs document management software to keep track of their policies and procedures.

IdTracks-Docs is a secure, intranet based application designed to provide a reliable user-friendly interface for management and control of document workflow. IdTracks-Docs provides automated reminders of document expirations, updates, version control, and revision tracking, as well as, robust document search capabilities for current and historical documents.

Indidge Systems and idTrack-Docs can help healthcare organizations achieve legal compliance and operational excellence in managing their policies and procedure documents.
