Scottsdale Healthcare Adopts New Policy and Procedure Management Software

TEMPE, AZ—Scottsdale Healthcare, one of Arizona’s most well-known hospital systems, has installed Indidge Systems idTrack-Docs document management software to keep track of their policies and procedures.

IdTracks-Docs is a secure, intranet based application designed to provide a reliable user-friendly interface for management and control of document workflow. IdTracks-Docs provides automated reminders of document expirations, updates, version control, and revision tracking, as well as, robust document search capabilities for current and historical documents.

Michael Gleason, IT Director for Scottsdale Healthcare, is delighted with the new software system: “Since documents are being tracked electronically and controlled centrally, we don’t have to worry about remembering to update policies and procedures. The implementation of IdTracks-Docs has allowed us to push the management of Policy and Procedure updates to each department while maintaining the control and accountability necessary to insure compliance. Link and search features have improved the management of evidence-based patient care policies”.

Indidge Systems and idTrack-Docs can help healthcare organizations achieve legal compliance and operational excellence in managing their policies and procedure documents.
